## *Drizzle Coat*

***The Drizzle raincoat is an essential outfit for every dog in rainy, windy or muddy weather.***

The Drizzle coat is also excellent in cooler temperatures due to the **warming foil patterning** in its lining. The aluminium in the foil print reflects the dog's own body heat, thus stimulating blood circulation and warming the dog efficiently. Thanks to its muscle-warming properties, Drizzle is also ideal for dogs engaged in active sports for warming up and maintaining their well-being before and after performance.

The **entirely new technical structure of the collar** means that the seams can be taped even more comprehensively than before. In contrast to previous models, Drizzle's collar seams are vertical, allowing the collar to be taped so that it is fully waterproof. In addition, there is a rain collar made of waterproof tricot around the edge of the collar, preventing water from going inside the coat along the dog's neck. The comfortably soft collar can be tightened up around the dog's neck to protect the chest and neck area.

The large, attractive **reflective prints** on the coat's rear hem and the **3M reflector piping** on the back improve safety and visibility in the dark.

The excellent sizing of the Drizzle coat guarantees a good fit for most breeds. The wide belly flap keeps the coat in place, ensuring that it stays on without restricting the dog's movement, even during boisterous play. The flap covers the dog's belly and efficiently protects it from mud and sand. Drizzle is made of an elastic and silent fabric, so it is comfortable to use and quick to put on.

# PRODUCT INFORMATION

- Surface fabric 100% PES 150D (=thickness in deniers) Mechanical stretch
- Waterproof and breathable, laminated material: water-resistance: 5,000 mm, breathability: 5,000g/m<sup>2</sup>/24h
- Tearing strength: Weft 15.3N; Warp 19.4N
- Lining technical 100% PES mesh fabric, 120g/m<sup>2</sup>
- The lining features heat-reflective foil that stimulates the dog's blood circulation
- Flexible collar rain trap, made of waterproof tricot, which prevents water from going inside the coat.
- The seams are taped shut, making the coat waterproof
- 3M reflector strips, luminous intensity: 500cd/(lx.m<sup>2</sup>)
- Visible reflector printing, luminous intensity: 330cd/(lx.m<sup>2</sup>)
- Adjustable closing strings at the neckline and rain collar.
- About 0-5 cm adjustable back length
- Opening for harness on the back of the coat, closable with press studs
- Foot loops ensure that the hem of the coat stays in place
- Reflective zip slider
- Both the lining and surface fabric are certified to be safe and free of harmful substances in accordance with the Öko-Tex-standard 100.
